FortiClient download and installation instructions

If you need to connect to DYUnet from off campus for vital campus resources, you need to set up a VPN(Virtual Private Network).

For first-time installation, please refer to Step 1 to Step 3. If the installation has been completed previously, please refer to Step 4 to Step 7.

Step 1 : Please go to the Fortinet website to download FortiClient VPN only.

Step 2 : Download the installer and save it as a new file to your local machine.Please choose the corresponding application version based on your computer's operating system. For example, Download for Windows:

Step 3 : Run FortiClient VPN Online Installer (It is recommended to temporarily disable your antivirus software.) •

Step 7: Login Successful Screen

- After successfully logging in and connecting to the VPN, please minimize the FortiClient VPN program window (do not close it).
- If there are any web pages already open, they must be closed and reopened in order to successfully redirect to the campus network for use.
